

AUTOMATION TEST STORE

TEST SIGN-OFF

Project Name	Automation Test Store — QA Test Case Execution
Application	Automation Test Store (Demo Web Store)
Prepared By	Vijayasree J S
Role	QA / Tester
Date	April-2026

1. Purpose

This document records the formal sign-off status of the manual functional testing performed on the Automation Test Store demo web application, and captures any outstanding known issues at the time of sign-off.

2. Testing Summary

Metric	Value
Modules Covered	6
Total Test Cases	120
Total Defects Logged	14
Critical Severity (Open)	1
High Severity (Open)	3
Medium Severity (Open)	4
Low Severity (Open)	6

3. Outstanding Known Issues

The following Critical and High severity defects are open at the time of this sign-off:

BugID	Title	Severity
BUG-010	Checkout completes despite item stock being zeroed out concurrently	Critical
BUG-003	No account lockout after repeated failed login attempts	High
BUG-005	Cached account page briefly renders after logout via browser Back	High

BugID	Title	Severity
	button	
BUG-008	Out-of-stock product can be added to cart without warning	High

4. Sign-off Recommendation

Given that 1 Critical and 3 High severity defects remain open, full unconditional sign-off is not recommended until these are resolved or explicitly accepted as known issues by the Approver. Please select the applicable decision below:

- ☐ Approved—all testing complete, no blocking defects
- ☐ Approved with known issues — release may proceed; open defects listed above are accepted as known issues
- ☐ Not approved—resolution of open defects required before release

5. Approval

Role	Name	Date
Prepared by (QA)	Vijayasree JS	April 2026
Approved by	Subin P John	April 2026
